

Talisker Intersects 1 g/t Au over 116.25m within 0.56 g/t over 441.2m Confirming 1,100m Continuous Vertical Panel at Pioneer

TORONTO, Sept. 7, 2021 /CNW/ - Talisker Resources Ltd. ("**Talisker**" or the "**Company**") (TSX: TSK) (OTCQX: TSKFF) is pleased to announce results from drill holes SB-2021-048 and SB2021-055 at its 100% owned flagship Bralorne Gold Project. These holes are the fourth and fifth holes drilled by Talisker this year in the recently discovered bulk-tonnage mineralization at Pioneer, located 2 kilometres to the south-east of the Bralorne township. Talisker continues to drill high grade vein resource at Bralorne.

Key Points:

- Hole SB-2021-048 intersected 1g/t over 116.25m within a larger intercept of 0.56g/t over 441.2m
- Hole SB-2021-048 was drilled to test down-dip continuity from previously released hole SB-2021-040 that intercepted 1.02 g/t over 114.15m. Results released today extend continuity 600 metres down-dip from hole 40.
- Hole SB-2021-055 intersected 0.68 g/t over 51.50m including 0.80 g/t over 34.55m. Three voids were intercepted as part of this interval and correspond with stopes from previously mined veins.
- Hole SB-2021-055 was drilled to test the up-dip continuity of hole SB-2021-026 that intersected 1.17 g/t Au over 106.75m. Results released today extend continuity 130 m down-dip from hole 26.
- Combined, holes SB-2021-026, SB-2021-030, SB-2021-040, SB-2021-048 and SB-2021-055 confirm an 1,100m continuous vertical panel of mineralisation from surface.
- Stepout hole SB-2021-025, drilled 200 metres to the south-east of these holes is expected to be released to market shortly.
- Stepout hole SB-2021-063, drilled 200 metres to the north-west of these holes is completed and at the laboratory awaiting assay.

"The results from these holes confirm the consistency of the mineralization encountered at Pioneer over broad intervals," commented Terry Harbort, Chief Executive Officer of Talisker, who added, "We are progressing aggressively with this new discovery drilling multiple 200m stepouts along the 3.2 kilometre strike length to the northwest to define the mineralized footprint at Pioneer."

A total of 54,500 m have been drilled this year out of a planned and fully funded 100,000 metre diamond drill program. Since acquiring the Bralorne Gold Project, Talisker has completed 76,700 m of drilling. Five drill rigs are currently active at the Bralorne Gold Project. There are currently 29 holes consisting of 11,451 samples at the assay laboratory and are expected to be received by the Company shortly.

Table 1: Received and Pending Intercepts with Visible Gold Count and Vein Count

Drill Hole	Intrusive Intercept Thickness (m)	Visible Gold Count	Major Veins	Minor Veins Count	Assay Results	Gram-meters	Section Line Closest to Collar

* Diamond drill hole currently in progress, data collected to 2021-09-02.

SB-2021-048

- Pioneer Block
- Complete preliminary results have been received for this hole.
- The New Bulk Zone was intersected within the granite at 828.8m and produced 1.0 g/t gold over 116.25m, within a larger intercept of 0.56 g/t gold over 441.2m.
- This hole drilled to a final depth of 11415.5 m on July 17, 2021.

Note: Diamond drill hole SB-2021-048 has collar orientation of Azimuth 208; Dip -65.

- Pioneer Block
- Complete preliminary results have been received for this hole.
- The New Bulk Zone was intersected within the granite at 236.7m and produced 0.68 g/t gold over 51.50m, including 0.80 g/t gold over 34.55m.
- This hole drilled to a final depth of 295.6m on June 25, 2021.

Note: Diamond drill hole SB-2021-055 has collar orientation of Azimuth 208; Dip -46.

Qualified Person

The technical information contained in this news release relating to the drill results at the Bralorne Gold Project has been approved by Leonardo de Souza (BSc, AusIMM (CP) Membership 224827), Talisker's Vice President, Exploration and Resource Development, who is a "qualified person" within the meaning of National Instrument 43-101, Standards of Disclosure for Mineral Projects.

About Talisker Resources Ltd.

Talisker is a junior resource company involved in the exploration of gold projects in British Columbia, Canada. Talisker's projects include the Bralorne Gold Complex, an advanced stage project with significant exploration potential from a historical high-grade producing gold mine as well as its Spences Bridge Project where the Company holds ~85% of the emerging Spences Bridge Gold Belt and several other early-stage Greenfields projects. With its properties comprising 282,403 hectares over 258 claims, three leases and 198 crown grant claims, Talisker is a dominant exploration player in the south-central British Columbia. The Company is well funded to advance its aggressive systematic exploration program at its projects.

Sample Preparation and QAQC

Drill core at the Bralorne project is drilled in HQ to NQ size ranges (63.5mm and 47.6mm respectively). Drill core samples are minimum 50 cm and maximum 160 cm long along the core axis. Samples are focused on an interval of interest such as a vein or zone of mineralisation. Shoulder samples bracket the interval of interest such that a total sampled core length of not less than 3m both above and below the interval of interest must be assigned. Sample QAQC measures of unmarked certified reference materials (CRMs), blanks, and duplicates are inserted into the sample sequence and make up 9% of the samples submitted to the lab for holes reported in this release. Sample preparation and analyses is carried out by ALS Global in North Vancouver, British Columbia, Canada and SGS Canada in Burnaby, British Columbia, Canada. Drill core sample preparation includes drying in an oven at a maximum temperature of 60°C, fine crushing of the sample to at least 70% passing less than 2 mm, sample splitting using a riffle splitter, and pulverizing a 250 g split to at least 85% passing 75 microns (ALS code PREP-31 / SGS code PRP89). Gold in diamond drill core is analysed by fire assay and atomic absorption spectroscopy (AAS) of a 50g sample (ALS code Au-AA26 / SGS code GO_FAA50V10), while multi-element chemistry is analysed by 4- Acid digestion of a 0.25 g sample split with detection by inductively coupled plasma mass spectrometer (ICP-MS) for 48 elements (Ag, Al, As, Ba, Be, Bi, Ca, Cd, Ce, Co, Cr, Cs, Cu, Fe, Ga, Ge, Hf, In, K, La, Li, Mg, Mn, Mo, Na, Nb, Ni, P, Pb, Rb, Re, S, Sb, Sc, Se, Sn, Sr, Ta, Te, Th, Ti, Tl, U, V, W, Y, Zn, Zr). Gold assay technique (ALS code Au-AA26 / SGS code FAA50V10) has an upper detection limit of 100 ppm. Any sample that produces an over-limit gold value via the gold assay technique is sent for gravimetric finish (ALS method Au-GRA22 / SGS method GO_FAG50V) which has an upper detection limit of 1,000 ppm Au. Samples where visible gold was observed are sent directly to screen metallics analysis and all samples that fire assay above 1 ppm Au are re-analysed with method (ALS code Au-SCR24 / SGS code - 6 - GO_FAS50M) which employs a 1kg pulp screened to 100 microns with assay of the entire oversize fraction and duplicate 50g assays on the undersize fraction. Where possible all samples initially sent to screen metallics processing will also be re-run through the fire assay with gravimetric finish provided there is enough material left for further processing

Caution Regarding Forward-Looking Information

Certain statements contained in this press release constitute forward-looking information. These statements relate to future events or future performance. The use of any of the words "could", "intend", "expect", "believe", "will", "projected", "estimated" and similar expressions and statements relating to matters that are not historical facts are intended to identify forward-looking information and are based on Talisker's current belief or assumptions as to the outcome and timing of such future events. Actual future results may differ materially. In particular, this release contains forward-looking information relating to, among other things, effective time of the rights provided to New Gold under the Investor Rights Agreement, the completion of New Gold's strategic investment; the completion of the Offering, the use of proceeds, the operations of the Company and the timing which could be affected by the current global COVID-19 pandemic. Those assumptions and factors are based on information currently available to Talisker. Although such statements are based on

reasonable assumptions of Talisker's management, there can be no assurance that any conclusions or forecasts will prove to be accurate.

While Talisker considers these statements to be reasonable based on information currently available, they may prove to be incorrect. Forward-looking information involves known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking information. Such factors include market risks and the demand for securities of the Company, risks inherent in the exploration and development of mineral deposits, including risks relating to changes in project parameters as plans continue to be redefined, risks relating to variations in grade or recovery rates, risks relating to changes in mineral prices and the worldwide demand for and supply of minerals, risks related to increased competition and current global financial conditions and the COVID-19 pandemic, access and supply risks, reliance on key personnel, operational risks, and regulatory risks, including risks relating to the acquisition of the necessary licenses and permits, financing, capitalization and liquidity risks.

The forward-looking information contained in this news release is made as of the date hereof, and Talisker is not obligated to update or revise any forward-looking information, whether as a result of new information, future events or otherwise, except as required by applicable securities laws. Because of the risks, uncertainties and assumptions contained herein, investors should not place undue reliance on forward-looking information. The foregoing statements expressly qualify any forward-looking information contained herein.
