

Senior Engineer

Join our team as one of two Senior Mining Engineers and drive the short, medium and long-term planning at our Mustang mine. Take the next step in your career demonstrating your capabilities as you design and schedule this narrow vein longhole mine and de-risk key mining considerations such ventilation, and geotechnical conditions. Reporting to and supporting the General Manager, Bralorne Gold Mines, you will:

- Align the annual budget process and monthly forecasting to the LOM plan and business strategy;
- This role would suit a Senior Mining Engineer or Mining Engineer looking for the next challenge;
- Develop and manage the underground mine design and schedule;
- Perform engineering studies with a focus on optimization and innovation;
- Collaborate with site exploration, geotech and operating teams in order to deliver a cohesive plan with a common goal;
- Coordinate work by suppliers and consultants; and
- Coordinate and communicate with oncoming technical personnel to ensure consistency and continuity of work.

Qualifications:

To be successful in the role, you will have the following:

- Bachelor degree in Mining Engineering
- Five years onsite underground mining experience
- Minimum 12 months mine planning experience, preferably in underground narrow vein deposits
- Experience with Amine, Deswick or similar scheduling software
- Spatial design skills and awareness
- Familiar with underground mine compliance
- Strong communication skills
- Strong attention to detail
- High aptitude towards analytical tasks
- Advanced knowledge of mine equipment, ore flow systems, ventilation or rock mechanics considered an asset

Benefits:

- Small team = large contribution. You will have the ability to make significant contributions that will have lasting effects
- Competitive salary with benefits

Start Date, Location and Schedule:

- Start Date: January 2024
- Location: BC based resident preferred. The position is a hybrid mix of working from home with travel to and working from the Bralorne Mine site.
- Schedule: Position is required to be at the Bralorne Mine site 2 times per month, on a biweekly rotation. Room and board will be provided while at the Bralorne Mine Site.
